Communication & Collaboration: Cross-functional Collaboration | Plain Language Writing | Public Speaking | Teaching

Systems & Processes: Project Management | Problem Solving | Process Improvement | Agile | Lean

Tools & Technology: Excel | Power BI | PowerPoint | Jira | Microsoft Suite | Google Workspace | Self-Learning

WORK EXPERIENCE

Home Office | Ogden, UT

2025 - present

Analyst and Project Manager (05/2025 - present)

- Developed business analysis skills by completing industry-recognized certifications (CAPM, ECBA, CAP-E) and building a project portfolio focused on data analysis, systems thinking, and project management.
- Designed and launched a portfolio website to demonstrate hands-on skills in SQL, Python, and Jira by managing and documenting full project lifecycles from scope to solution and strategic upskilling.

Internal Revenue Service | Ogden, UT (Hybrid)

2019 - 2025

Emerging Technology Analyst (06/2024 - 04/2025)

- Supported digital transformation initiatives by analyzing legacy system data to develop actionable strategies for increasing adoption of IRS digital products by 10%.
- Facilitated cross-functional collaboration between UX, product, and business teams to implement new digital strategy, ensuring alignment of technical requirements with business objectives.
- Gathered business requirements, documented epics, user stories, and acceptance criteria in SharePoint, collaborated with contractors, and tested delivered solutions.
- Reduced processing time of customer surveys by 30% by independently developing and deploying a Microsoft Forms solution that automated survey digitization and centralized data analysis.
- Saved 40+ hours of prep time by designing a dynamic Excel visualization tool and automating communication flows to streamline operational planning, resolve client pain points, and enable data-driven decision making.

Lead Contact Representative (10/2023 - 05/2024)

- Optimized workload distribution across 15+ team members, ensuring equitable task assignment and timely case progression by analyzing operational data from enterprise reports.
- Improved team accuracy by 0.2% over 2 months by monitoring key performance metrics, identifying trends and implementing strategic coaching.
- Transformed team performance, with 30% of employees achieving and sustaining 100% quality scores within 4 weeks, by conducting data-driven reviews and meetings to identify skill gaps and developing tailored job aids.
- Solved day-to-day team escalations as a domain subject matter expert (SME) by interpreting system data and

IRS policies, using plain language and metaphor to translate complexity into simple, relatable scenarios.

- Ensured consistent application of IRS policies by reviewing official quality reports for accuracy, explaining valid defects to employees, and submitting research-backed rebuttals to request corrections of invalid findings.

Customer Service Representative (10/2019 - 04/2024)

- Supported specialty case backlog reduction by proactively adapting to a skills bottleneck through self-initiated certification training while maintaining regular duties, and immediately surpassing productivity goals by 450%.
- Diagnosed complex taxpayer inquiries with 100% accuracy by investigating multiple integrated databases to conduct real-time analyses, and articulated findings with next steps in clear, audience-specific language.
- Increased new hire engagement and knowledge retention by 25% by converting 44 training decks and 3 PDF guides into interactive formats and adapting instructional style to incorporate dynamic visuals.
- Handled high-priority ad hoc requests for taxpayer account corrections promptly, often the same day, delivering accurate resolutions and clear, detailed documentation for internal records.
- Volunteered as back-up lead, maintaining continuity by assigning work, resolving technical issues and supporting management.

Cash Clerk (01/2019 - 10/2019)

- Ensured 100% accuracy while entering and verifying high-volume financial data in IRS systems by conducting quality checks on scanned records and reconciling daily deposit logs with system records.
- Analyzed payment vouchers for data accuracy and special coding requirements, flagging exceptions such as split remittances and mismatched information for appropriate routing.
- Streamlined onboarding through a 40% workload spike by creating standardized cross-training documentation that ensured consistent application of procedures and security protocols.
- Volunteered as back-up lead, maintaining continuity by assigning work, properly routing check exceptions for processing and delivering mail packages.

Utah Military Academy | Riverdale, UT (On-site)

2017 - 2018

Math Teacher (08/2017 - 10/2018)

- Increased student comprehension by 75% through clarification of complex concepts, such as geometric proofs, into accessible frameworks, using incremental learning sequences, student feedback and agile instruction.
- Partnered with the math department to define core skill progressions across grade levels using quantitative assessment data, and collaboratively designed curricula to target learning gaps.
- Leveraged digital learning platforms like Canvas and Khan Academy to collect and analyze student performance data, enabling targeted intervention strategies, smarter instruction and increased engagement.

Monticello Academy | West Valley City, UT (On-site)

2016 - 2017

Math Teacher (08/2016 - 07/2017)

- Managed comprehensive digital learning environments for 150+ students across multiple grade levels, organizing resources and assessment data, and presenting performance trends to parents and administrators.
- Supported diverse learners through mentoring and an interdisciplinary summer program, translating abstract math concepts with creative applications like animation to promote accessibility and real-world understanding.
- Integrated digital assessment tools including Khan Academy, Prodigy, and Kahoot to collect performance metrics and provide strategic instruction.
